VOLUME IV. – SOUTH AUSTRALIA

PART I. – ANALYSIS OF POPULATION IN LOCAL GOVERNMENT AREAS AND IN NON-MUNICIPAL TOWNS (1,000 PERSONS OR MORE)

PREFACE

This publication shows, for the State of South Australia, the numbers of males and females in each Municipal Corporation, District Council and Town with 1,000 persons or more, classified according to the characteristics of the population recorded at the 1954 Census. The characteristics dealt with in the following pages are:– Age, Conjugal Condition, Birthplace, Period of Residence in Australia (of other than Australian-born), Nationality, Religion, Industry and Occupational Status.

This is the second Part issued of the five Parts which will constitute the complete Census Volume for the State of South Australia. Part V. – Population and Occupied Dwellings in Localities has already been issued, and the remaining three Parts, which will be issued as the relevant information becomes available, will be entitled: Part II. – Cross-classifications of the Characteristics of the Population; Part III. – Analysis of Dwellings in Local Government Areas and in Non-municipal Towns; and Part IV. – Cross-classifications of the Characteristics of Dwellings and of Householders. A similar Volume will be prepared for each of the remaining States, for the Territories, and for Australia as a whole.

The foregoing arrangement, which provides for the progressive issue of Census information for each State, and a separate volume for convenient reference to all information published for a State, is a departure from previous practice when a series of approximately 30 Census Parts was published, some dealing specifically with data for individual States and others presenting both State and Commonwealth details in respect of a single characteristic of the population or of the dwelling.

At previous Censuses a series of 25 preliminary Census Bulletins was published giving particulars of population and dwellings in summary form for each State and Territory, but it is not proposed to repeat this issue for the 1954 Census, and only a few preliminary Bulletins will be published as the need arises.

As for the 1947 Census, provision has been made for the issue of a number of supplementary statements in mimeograph form. A list of the 1954 Census publications already issued is shown inside the back cover of this Part.

Explanatory Notes relative to the method of presentation of data in this Part, and to Statistical Divisions, Non-municipal Towns, and various other matters follow the Table of Contents. Following the Explanatory Notes are Summary Tables showing the total numbers of the population in the various Municipal Corporations and District Councils and Statistical Divisions throughout South Australia.

EXPLANATORY NOTES

This Part contains particulars of the population of each Municipal Corporation and District Council in South Australia according to various characteristics of the population, and corresponds to Part IV. – Analysis of Population in Local Government Areas, South Australia, of the 1947 Census.

The method of presenting data herein differs from that adopted in the 1947 Part, in that (i) detailed information is provided for the first time for Non-municipal Towns with a population of 1,000 persons or more, (ii) Municipal Corporations and District Councils are arranged in alphabetical order within Statistical Divisions and not in alphabetical order only, and (iii) particulars are given for males and females in the same table, instead of in separate tables, thus facilitating the addition of totals for persons.

The provision of separate details for Non-municipal Towns of 1,000 persons or more (i.e., towns not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes) enables the inquirer to obtain a more realistic sub-division of population and dwellings of the State into urban and rural than was possible from the results of previous Censuses. The term "Urban", as applied to South Australia at the 1947 Census, referred to the Metropolitan Area of Adelaide and to all Municipal Corporations outside that area. In 1954 the term was extended to cover, in addition, all towns with a population of 1,000 persons or more. "Rural" relates to the remainder of the State.

The arrangement of Census data for Municipal Corporations and District Councils into Statistical Divisions approximately the same as those used in State statistical publications has substituted a series of broad geographical groupings for the former arrangement in alphabetical order. Following these Notes, however, there is an alphabetical list of Municipal Corporations and District Councils, showing the total numbers of males, females and persons in each, and also the totals for each Statistical Division and the Metropolitan Area of Adelaide.

A map showing the location and composition of each Statistical Division, and a detailed map of the Metropolitan Area of Adelaide, are inserted at the end of this Part. There is also an index to facilitate reference to any local government area or town for which particulars are shown.

The local government system in South Australia consists of separately incorporated Municipal Corporations and District Councils. Beyond the limits of this system, however, there is a large area, comprising about 86 per cent. of the total area of the State, which is not incorporated. Parts of this not incorporated area have been included within the several Statistical Divisions, but the remainder, and the greater proportion by far, lies outside the boundaries of these Divisions. The proportion of the total population of the State within the not incorporated areas is relatively small – slightly less than 2 per cent. The South Australian local government areas for Census purposes were, in general, as constituted at 30th September, 1953.

The term "Migratory" used in the following tables refers to persons not elsewhere enumerated who at midnight between 30th June and 1st July, 1954 were travelling on ships in South Australian waters or on long-distance trains.

Particulars of full-blood aboriginals are excluded throughout.

Because of the limitations of space and the need for uniform presentation of data, it has not been possible to publish more detailed information in each table of this Part. This applies particularly to the tables on age and industry, and in a lesser degree to the tables on birthplace and nationality. Information is available in much greater detail, and will be published in Part II. – Cross-classifications of the Characteristics of the Population.

For the first time in Australian Census procedure all cases of ages omitted from the Census schedule have had an age allocated under a system which is fully explained in the "Statistician's Report".
